

## **IMA SATYAGRAHA, SUGGESTED SLOGANS**

- Writing prescription drugs by a non-MBBS is injurious to health of the community.
- Writing prescription drugs by unqualified people can be dangerous.
- Allow doctors to treat patients irrespective of patients' income.(If compensation is not capped, we can't do this)
- When there is capping of Rs 2 lakh for a sterilization death, why not for other procedures?
- When there is a compensation of Rs 30,000/- for a sterilization failure, why not for other procedures?
- Allow us to treat poor and rich equally.
- Non pelvic ultrasound providers should be out of PCPNDT Act.
- Unless caught doing sex determination, no criminal offence shall be registered.
- If any prospective parent asks for sex determination, they should be booked under a non bailable offense.
- More patients will die if doctors are not provided protection during duty hours.
- Death does not mean negligence.
- Money spent does not mean you will get a cure.
- Including single clinic and small establishments under Clinical Establishment Act will make treatment costly.
- How can we treat patients using outdated standard treatment guidelines made by government?
- How can government decide the charges of a clinical establishment?
